

# Test Summary Report – SwagLabs

---

**User Story:** Checkout – Swag Labs

**Prepared by:** Mohamed Lofty Elzoghby & Mohamed Yousry Said

## Test Execution Overview

**Total Test Cases: 64**

- High Priority: 3                    - Medium Priority: 22                    - Low Priority: 8

## Execution Results:

- Passed: 25                    - Failed: 39

## Defect Summary

**Total Defects: 36**

### - Severity:

• Major: 33                    • Low: 3

### - Priority:

• High: 33                    • Low: 3

## Analysis & Observations

- The failure rate is high, with more than half of the test cases failing.
- Most of the reported bugs are classified as **Major** with **High Priority**, which indicates a significant impact on the Checkout Flow.
- A few bugs are categorized as **Low severity/priority**, with limited impact.

## Conclusion & Recommendation

- The module is currently unstable and not ready to move to the next phase.
- Focus should be placed on fixing the **Major/High Priority bugs** before re-execution.
- It is recommended to perform **Regression Testing** after the fixes to ensure system stability.
