Title	UI Error Message overlaps Input Fields and Shows Incorrect Text for Invalid Credentials
Description	On the login page, when entering a invalid username with an invalid password, the error message appears in a red box overlapping the input fields.
Steps	<p>1- open URL : https://www.saucedemo.com/v1/index.html</p> <p>2- Enter "stand_user" at username field</p> <p>3- Enter "sec_sauce" at password field</p> <p>4- click "Login" button</p>
Expected result:	System login unsuccessful with understandable and centered error "Username and password don't match any user in this service"
Actual result:	System show error message that contain “Epic sadface: Username and password do not match any user in this service”
Attachment	 <p>The screenshot shows a browser window for 'saucedemo.com'. The login form has a red error message box overlaid on the password field. The message reads: 'Epic sadface: Username and password do not match any user in this service'. Below the form, a terminal window displays accepted usernames and a password for all users.</p> <pre> Accepted usernames are: standard_user locked_out_user problem_user performance_glitch_user error_user visual_user Password for all users: SECRET_SAUCE </pre>

Title	UI Error Message Not Fully Visible for Invalid Password
Description	When an invalid password is entered, the error message is not fully visible and incorrectly describes both username and password as invalid.
Steps	<p>"1- open URL : https://www.saucedemo.com/v1/index.html</p> <p>2- Enter ""standard_user"" at username field</p> <p>3- Enter ""_sauce"" at password field</p> <p>4- click ""Login"" button"</p>
Expected result:	Display a clear error message such as 'Invalid password' without visual issues.
Actual result:	Displays 'Epic sadface: password do not match any user in this service' and the message is partially hidden
Attachment	 <p>The screenshot shows a browser window for 'Swag Labs'. The address bar shows 'saucedemo.com'. The main content is a login form with 'standard_user' in the username field and '_sauce' in the password field. A red error message box is centered over the form, displaying 'Epic sadface: password do not match any user in this service'. Below the form, there's a black sidebar with 'Accepted usernames are:' followed by a list of user names: standard_user, locked_out_user, problem_user, performance_glitch_user, error_user, and visual_user. To the right of the sidebar, it says 'Password for all users:' followed by 'secret_sauce'.</p>

Title	Incorrect Error Message Displayed for Invalid Username
Description	When an invalid username is entered, the error message incorrectly refers to both username and password as invalid and is not fully visible.
Steps	<p>"1- open URL : https://www.saucedemo.com/v1/index.html</p> <p>2- Enter ""standard_"" at username field</p> <p>3- Enter ""seceret_sauce"" at password field</p> <p>4- click ""Login"" button"</p>
Expected result:	Should display a clear message such as 'Invalid username.'
Actual result:	Displays 'Epic sadface: password do not match any user in this service' and is partially hidden.
Attachment	 <p>The screenshot shows a browser window with the URL 'saucedemo.com' in the address bar. The page title is 'Swag Labs'. Below it is a login form with two input fields: 'standard_user' in the username field and 'seceret_sauce' in the password field. A red error message box is centered over the form, displaying the text 'Epic sadface: Username and password do not match any user in this service'. Below the error message is a green 'Login' button. At the bottom of the page, there is a dark sidebar containing two columns of text: 'Accepted usernames are:' followed by a list of user names ('standard_user', 'locked_out_user', 'problem_user', 'performance_glitch_user', 'error_user', 'visual_user') and 'Password for all users:' followed by the password 'seceret_sauce'.</p>

Title	Error Message Persists After Correcting Invalid Credentials
Description	After entering an invalid password and then correcting it, the error message should disappear but remains visible.
Steps	<p>1- open URL : https://www.saucedemo.com/v1/index.html</p> <p>2- Enter ""standard_user"" at username field</p> <p>3- Enter ""_sauce"" at password field</p> <p>4- click ""Login"" button</p> <p>5- Enter ""secert_sauce"" at password"</p>
Expected result:	The error message should disappear once the credentials are corrected.
Actual result:	Error message remains visible even after valid credentials are entered.
Attachment	 <p>The screenshot shows the Saucedemo login interface. The user has entered "standard_user" into the username field and "secret_sauce" into the password field. A red error message box is displayed in the center of the screen, stating: "User name and password do not match any user in this service". Below the login form, there is a black box containing the following text:</p> <pre> Accepted usernames are: standard_user locked_out_user problem_user performance_glitch_user error_user visual_user Password for all users: secret_sauce </pre>

Title	Missing Username Field Validation on Login Page
Description	When both username and password fields are left empty, the error message does not clearly indicate missing input.
Steps	<p>1- open URL : https://www.saucedemo.com/v1/index.html</p> <p>2- Enter " " at username field</p> <p>3- Enter " " at password field</p> <p>4- click ""Login"" button"</p>
Expected result:	Should display an error message such as 'Username and password required.'
Actual result:	Displays 'Epic sadface: Username is required.'
Attachment	 <p>The screenshot shows a browser window for 'Swag Labs' with the URL 'saucedemo.com'. The login form has two red error messages: 'Username is required' above the username field and 'Password is required' above the password field. A red box highlights the error message for the username field. Below the form, a black sidebar displays accepted usernames ('standard_user', 'locked_out_user', 'problem_user', 'performance_glitch_user', 'error_user', 'visual_user') and the password ('secret_sauce').</p>
