

Swag Labs Sprint

Login Page Functionality

Prerequisites:

- Swag Labs website is accessible.
 - The internet is enabled.
-

As a Swag Labs user

I want to log in using a valid username and password

So that I can securely access the Products page

Acceptance Criteria:

- As a user, I should be able to access the login page of swag labs.
- As a user, I will input a valid username from one of the following :
 - standard_user
 - locked_out_user
 - problem_user
 - performance_glitch_user
 - error_user
 - visual_user
- As a user, I will input only one password for all usernames it's secret sauce
- As a **standard user**, I should be able to log in with a valid username and password, so that I can access the product inventory page.
- As a **locked-out user**, when I attempt to log in, I should see an error message that clearly states my account is locked.
- As a user, if I leave the username or password field blank and click “Login”, I should see an error message prompting me to enter the missing fields.
- As a user, if I enter invalid credentials, I should see an error message indicating the login failed.
- As a user, I should see my password masked while typing, so that my credentials remain private.
- As a user, I should be redirected to the “Products” page after a successful login.

Expected Results:

- A standard user is logged in successfully and redirected to the Products page.
 - A locked user sees the error message: “Sorry, this user has been locked out.”
 - If fields are left blank, the error message should appear:
 - “Username is required”
 - “Password is required”
 - For invalid credentials, the system shows: “Username and password do not match any user in this service.”
 - Password input is hidden with dots.
-

Dependencies:

- User accounts should already exist in the Swag Labs database (standard_user, locked_out_user...)
- Login screen should be accessible via browsers.
- Product page should be accessible after successful login.
- Proper error handling per user type.
