# Swag Labs
# Checkout

**Prerequisites:**

- The Swag Labs web application is accessible.

- The user has a valid account and is logged in.

- The user has added at least one product to the shopping cart.

- Internet connection is enabled.

**Acceptance Criteria:**

- As a client user, I will be able to click the Cart Icon to view selected items.

- As a client user, I can review cart contents and proceed by clicking Checkout.

- As a client user, I should be redirected to the Checkout: Your Information page where I must enter:

  • First Name (mandatory-English letters only)

  • Last Name (mandatory- English letters only)

  • Postal Code (mandatory)

- As a client user, if I leave any mandatory field empty, an error message will be displayed, and I cannot proceed.

- As a client user, once valid data is entered and I click Continue, I should be redirected to the Checkout: Overview page.

- As a client user, I will be able to review:

  • List of selected products

  • Item total, tax, and final total amount

- As a client user, clicking Finish should complete the order and redirect me to the Checkout: Complete! page.

- As a client user, I should see a confirmation message and order completion illustration confirming that the purchase is successful.

- As a client user, I should have the option to return to the Products page via the Back Home button.

**Expected Results:**

- The user can successfully complete the checkout process after providing mandatory details.

- Incomplete or invalid form submissions will be blocked with error messages.

- First Name and Last Name fields only accept alphabetic characters.

- The system should calculate totals correctly, including tax.

- After successful checkout, the user sees a confirmation message and can navigate back to the products page

**Dependencies:**

- Cart module (product selection).

- Checkout form validation.

- Payment/summary calculation logic.

- Confirmation page.
