swag labs

products page

Prerequisites:

- Stable internet connection is available.
- The website loaded successfully.
- User has logged in successfully.

Acceptance Criteria:

As a client user, after login I will be redirected to the products page which displays the available products.

1: *As a client user, I should see the header on both Products and Product Details pages containing site logo, cart icon, and menu options*:

- The site name/logo

- A shopping cart icon: Clicking the shopping cart icon redirects the user to the Cart Page, which displays the details of the products that were added to the cart.

- A menu with options:
  • **All Items**: redirects to the Inventory page
  • **About**: redirects to a page displaying information about the website
  • **Logout**: logs out the current user
  • **Reset App State**: resets the application to its initial state (empty cart, reset data)

2: As a client user, I will be able to sort products using the dropdown list by:

- Name (A → Z, Z → A)

- Price (Low → High, High → Low)

3: Each product is displayed with:

- Product image

- Product name

- Product description

- Product price (displayed in USD $)

- "Add to Cart" button

4: As a client user, when I click a product name or image, I will be redirected to the **Product Details Page**.

- The Product Details page displays:
  - Product image
  - Product name
  - Product description
  - Product price (displayed in USD $)
  - "Add to Cart" button
  - "Back to Products" button

5: At the bottom of both Inventory and Product Details pages, a footer is displayed containing:

- Social media icons/links: Facebook, LinkedIn, Twitter
- Text: *"© 2020 Sauce Labs. All Rights Reserved."*
- Links: *Terms of Service* and *Privacy Policy*

Expected Results:

- Inventory page loads after login.

- Header and footer are always displayed.

- Products are displayed and sorted correctly.

- Product details page opens with correct info.

- Add to Cart and Back to Products work correctly.

- Menu options work as expected (All Items: Inventory, About: About page, Logout : login page, Reset App State : reset cart).

Dependencies:

- The Cart Page depends on the products being added from the Inventory Page.
- If no products are added, the Cart Page will be displayed empty
- Access to the Cart Page depends on successful user login.
